UPGRADE

Upgrade to Oracle Database 19c

Next Long Term Support release

Oracle Database 23c

Upgrade possible only from:

- Oracle Database 19c
- Oracle Database 21c

Do you want to upgrade?

Oracle Database 11.2.0.4

Oracle Database 12.1.0.2

Oracle Database 12.2.0.1

Oracle Database 18c

Oracle Database 11.2.0.4
Oracle Database 12.1.0.2
Oracle Database 12.2.0.1
Oracle Database 18c

Oracle Database 19c

Oracle Database 23c

Move production database from
one long term support release to the next

Starting with Oracle Database 21c, installation of non-CDB Oracle Database architecture is no longer supported.

The non-CDB architecture was deprecated in Oracle Database 12c. It is desupported in Oracle Database 21c.

Database 21c, Upgrade Guide, chapter 10

Oracle Database 23c

Convert

--Use up to 3 PDBs without
--a license for Multitenant option

```
alter system set max_pdb=3;
```

Non-CDB to PDB conversion is irreversible

What are your fallback options?

PDB Conversion

FALLBACK

Backup / restore

Ensure you have a recent backup and requires time to restore and recover

Copy data files

Requires time and disk space to hold a copy of the data files

PDB Conversion

FALLBACK

Backup / restore

Ensure you have a recent backup and requires time to restore and recover

Copy data files

Requires time and disk space to hold a copy of the data files

Refreshable clone

Requires ~~time and~~ disk space to hold a copy of the data files

Requires Oracle Database 12.2 or newer

Refreshable Clone

CREATE

Create PDB from non-CDB over a database link

REFRESH

Apply redo from non-CDB to keep PDB up-to-date

OUTAGE

Disconnect users and refresh PDB for the last time

CONVERT

To become a proper PDB, it must be converted

Refreshable Clone

Source non-CDB

Target CDB

```
CREATE USER dblinkuser  
  IDENTIFIED BY ... ;  
  
GRANT CREATE SESSION,  
  CREATE PLUGGABLE DATABASE,

GRANT READ ON sys.enc$ TO dblinkuser;

DEMO

- Upgrade to Oracle Database 19c
- Migrate from non-CDB to PDB
- Using Refreshable Clone PDBs

The source non-CDB stays intact
to allow fallback

Works for unplug-plug upgrades as well

Always use the latest version of AutoUpgrade

PATCHING

Release Updates now contains all new time zone files

- Relevant only if your application uses `TIMESTAMP WITH TIME ZONE`

```
$ ls -l $ORACLE_HOME/oracore/zoneinfo
```

```
...
```

```
./oracore/zoneinfo/timezone_28.dat  
./oracore/zoneinfo/timezone_29.dat  
./oracore/zoneinfo/timezone_30.dat  
./oracore/zoneinfo/timezone_31.dat  
./oracore/zoneinfo/timezone_32.dat  
./oracore/zoneinfo/timezone_33.dat  
./oracore/zoneinfo/timezone_34.dat  
./oracore/zoneinfo/timezone_35.dat  
./oracore/zoneinfo/timezone_36.dat  
./oracore/zoneinfo/timezone_37.dat  
./oracore/zoneinfo/timezone_38.dat  
./oracore/zoneinfo/timezone_39.dat  
./oracore/zoneinfo/timezone_40.dat
```

When patching my database,
will it also patch my time zone file?

No, the time zone files are there, but you still need to perform the upgrade manually

Patches to the Perl interpreter in Oracle Home
is included in Release Updates

```
$ $ORACLE_HOME/perl/bin/perl -version
```

```
This is perl 5, version 36, subversion 0 (v5.36.0)  
built for x86_64-linux-thread-multi
```

You still need to update JDK in your Oracle Home

Does it contain security fixes?	No, Release Updates are still our way of fixing those
Do I need to patch monthly?	We recommend that
Do I need to re-certify my app?	No, but test like you would do with one-offs
What about databases in OCI?	To be decided
