ORACLE

Questions from Migration to Oracle Autonomous Database Part 1: Planning

Virtual Classroom 22

Oracle Autonomous Database (ADB)

What are the RPO and RTO metrics for ADB?

Check the documentation for such information.

Can you highlight the value of ADB Dedicated in a multi VM config?

This webinar focuses on the migration aspects, but have a look at the ADB FAQ.

Does ADB support Database Vault?

Yes. Check the documentation for details.

Does ADB support cascading standby databases?

Not as far as we know, but you can read more about Autonomous Data Guard in the documentation.

Can I set the same underscore parameters in ADB?

You can set a few of them - but not many. So, the way how you can tackle this: You can open an SR once you have the application deployed, and have specific parameters set for your ADB PDB. But be aware that not every parameter can be set on a PDB-basis. So, there are clearly some limitations. What would be good if we then can team up with the vendor and see how we can help. We have a special team working with app vendors and ISVs on such cases.

Oracle Estate Explorer

Where can I find more information about Oracle Estate Explorer?

You find more information in the documentation. Alternatively, there's a slack channel for specific questions, estate-explorer-community.

Migration

I have HCC compressed tables. Can I still use that in ADB?

Yes. ADB runs on Exadata hardware and utiliize the same features.

Can you tell something about migration methods to Oracle Database@Azure?

This webinar focuses on the planning part. In webinar 3, on June 5, we cover the individual migration options, including to other clouds. Sign up here.

Which migrations options, besides GoldenGate, can I use to migrate?

Generally, speaking you can use Data Pump in multiple ways optionally with GoldenGate on top. However, we do have a new option with transportable tablespaces coming soon. We cover the migraiton methods in details in webinar 3, on June 5. Sign up here.

Does ZDM or GoldenGate incur any license costs?

Migrating databases with ZDM is free, even when it involves using GoldenGate.

I want to know more about moving databases to OCI?

In this webinar, we focus on one of the cloud database services, being Autonomous Database. Some of the techniques are the same for other cloud services.

I want to migrate a database from another database service in OCI to ADB?

The procedure and methods that we show in this webinar series, applies to any type of source Oracle Database.
